PEAK WASTE RECYCLING

Pay-by-Weight

Reduce Waste - Save Money

Landfill Tax is currently charged at £40.00 per tonne and is set to increase by £8.00 per year, this is in addition to Landfill site costs.

All of our collection vehicles are fitted with onboard weighing machines and we introduced this system five years ago to make it fairer to customers who generate light waste.

More and more companies and institutions are realising that their waste is an important part of their business and have strategic recycling systems in place assisted by us.

How it works

A standard lift price is agreed to empty the bins, a 100kg weight limit is applied and any kg over this weight will be charged extra from a printed ticket by the driver then added to your invoice.

Recycling Alternatives

We offer the following recycling containers which help reduce the weight of your bin thus reducing your costs.

- Cardboard
- Glass
- Tins and cans
- Paper

Please call if you would like to discuss the above or if we can help in any other way.
